

Granville Attend Autocare Show

Granvillers Paul McGee and Simon Marston attended the Group Auto Autocare Trade Show down in Milton Keynes on Friday 17th April at the MK Arena.

Throughout the day they had the pleasure of meeting and greeting with delegates from across the motor trade and aftermarket, speaking to them

about Granville products and services and helping them to make the right

choice about their automotive aftercare needs.

"It was good to talk to people who use our products on a day to day basis," said Paul, Granville's Head of Sales.

Because Granville's policy is one of continuous improvement, the opportunity to get direct feedback from our clients is always a welcome one.

“It was particularly good to meet with some of our key distributors and their garage customers because it gave us an opportunity to better understand the dynamics of our relationship with them so that we can improve our service provision,” adds Paul “this demonstrates our commitment to our buying groups and to our clients in developing business together.”

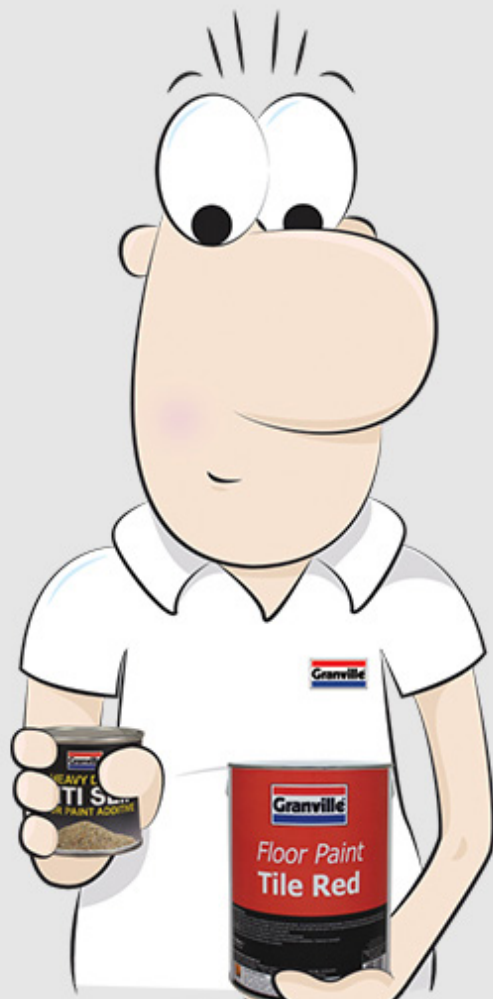

This was also an excellent opportunity to chat to customers about their views regarding engine specific oils.

“Having spoken to many customers about engine specific oils throughout the day, it would appear that many understand the reasons why correct oils should be used,” commented Simon.

This is great news because it has always been a priority of Granville’s to make sure that our clients understand the importance of making the right choice in lubricants for their engine so it is good to hear that this message is being well received.

5 Things People Forget ~MOST~ When Spring Cleaning The Car

The weather is finally starting to look up and if you haven't thought about it already, then it's time to start prepping your vehicle for the warmer months ahead. Your car took a beating over winter. Freezing temperatures, mud, salt and bad weather all take their toll on your paintwork and interior.

It's standard practice to reach for the chammy, bucket and vacuum around this time of the year to bring some life back into your vehicle, but there are some key steps to the vehicle spring clean that most people neglect that are really easy to address. Are you guilty of these top 5 Spring Cleaning sins?

Clean Between the Seats

Let's face it, most of the time it's out of sight out of mind when it comes to stray crumbs and debris down the back of seats and in those hard to reach places of your vehicle but built-up dirt and grime accelerates wear and tear on fabric. Take the opportunity to vacuum in the creases between seats and all those other places dirt may be lurking.

Why not replace your floor mats whilst you're at it? They will probably be looking worse for wear around this time of year. Granville supply a range of Kraco floor mats specially packaged just for us to suit all budgets and vehicle types.

Look After Your Windows

It's surprisingly easy to neglect your windows when doing your spring clean. A quick once over with the bucket and sponge and job done, right? Think about changing your windscreen wipers and topping up your screenwash. The chances are they could do with replacing after heavy use over the winter months.

We also recommend Rain-X 2in1 Glass Cleaner and Rain Repellent to get windows sparkling clean in one easy step, whilst enhancing visibility when driving through those April Showers.

Check your Tyres!

Tyres take a beating in the winter months so make sure that you check they are correctly inflated and the tread depth is over 1.6mm.

Assuming your tyres are in good condition, why not treat them to a coat of Turtle Wax Wet 'n' Black? It's super easy to apply and requires no wiping or buffering to achieve a long lasting shine.

Top-Up your Fluid

As always check your oil and water levels, but don't forget about the transmission fluid and coolant too. If in doubt, give Granville's Technical Advice line a call for advice about which fluids and lubricants are best for your vehicle.

Your Fuel System Needs Cleaning Too!

Looking after the fuel system can significantly improve fuel efficiency and reduce costly service bills. The 10k Boost range has a wide variety of additives which will give your fuel system a good clean out.
