Success at CAAR Trade Show

19th & 20th May saw Granvillers hit the road once again, this time to the CAAR Trade Show in the picturesque surroundings of Forest of Arden, Birmingham.

Throughout the day they had the pleasure of meeting and greeting with delegates from across the motor trade and aftermarket, speaking to them about Granville products and services and helping them to make the right choice about their automotive aftercare needs.

Prize draws ran throughout the day for CAAR members with lots of cash prizes and goodies given away. Special congratulations to Mr Clive Woodhouse of C.A.W. Motor Factors in

Chester who walked away with Granville's donation to the prize pool: an Outdoor Gas Patio Heater.

Granville also did well at the CAAR trade show award ceremony with Dave Baker, sales agent at Priority Sales on behalf of Granville, walking away with Sales Agent of the Year 2014. Granville were also shortlisted in the top 3 Suppliers of the Year for CAAR.

a very poorly
chamois leather

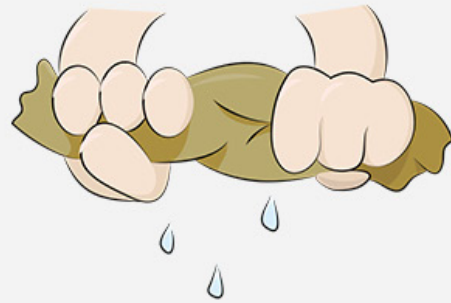

How to look after your Genuine Chamois Leather

The best way to get the most out of your genuine chamois leather is to take good care of it. Follow these steps and you will get the best results and the best value out of your Chamois!

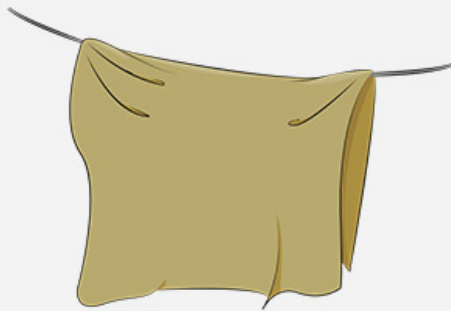

1. Rinse after every use in warm soapy water with natural soap or car wash shampoo.

Never use detergent or bleach! This will degrade the leather and make it brittle

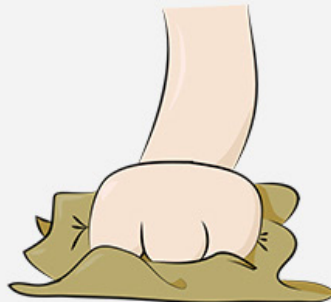

2) Rinse in warm clean water and gently wring out excess water

TIP if you re-lather soap into the leather after rinsing this will help to keep the leather soft

3. Stretch out and hang up to dry naturally out of direct sunlight

4. When Chamois is completely dry, rub against a hard surface to soften the leather

5. Fold and store in cool, dry conditions until next use

Never store Chamois Leathers damp! This will encourage mould growth and reduce the life of your Chamois

C3 5W/30: New to the Hypalube Range

Granville is pleased to announce the introduction of the Hypalube C3 5W/30 to our Hypalube collection. It is a low viscosity, fuel efficient engine oil suitable for use in vehicles fitted with exhaust emission after-treatment devices requiring low SAPS engine oil.

“Our new C3 Hypalube fills a gap created by the consumer requiring a basic C3 specification product with limited application” said Simon Marston, Special Projects Manager for Granville Oil & Chemicals.

Hypalube C3 has been formulated using the highest quality base oils and additives offering ultimate protection for the engine and for the after-treatment device. As always, Granville recommends the use of oil specific to your engine's requirements. If you are unsure about your engine's specifications call the Granville Technical Advice Line on +44 (0)1709 890099.
