More than just an oil company

Granville has invested heavily in Customer service and marketing programmes to build awareness of Granville throughout the UK.

With 99% stock availability, a dedicated Sales Team, highly developed order collation, quick order turnaround and rapid deliveries we always aim to exceed our Customer's expectations.

Over 70% of the Granville range is manufactured in our own factory with significant manufacturing capacity across all our core product areas.

Our vehicle specific lubricants, all meeting the latest technical specifications, are manufactured and distributed from our modern facility located in South Yorkshire.

Continued evolution

The covid pandemic caused many businesses to revisit their supply chain, operations, stockholding and review their use of “just in time” production practices as a result of what would previously have been considered unprecedented global disruption. At Granville we reviewed our operations and supply chain and established a weakness for us was in the sourcing of bottles.

To resolve this we have invested in blow moulding equipment to be able to manufacture our own bottles as needed. This improves resilience, efficiency and is significantly more environmentally friendly as we will negate at least 100 truck journeys per year saving 1000 tonnes of CO² per year. The ability to manufacture bottles and fill them on a single site is a major step forward in Granville’s evolutionary journey.

The performance-proven speciality lubricants and greases from the **LIQUID WRENCH**® brand help professionals solve problems that span extraordinary to everyday. Built on decades of American heritage, **LIQUID WRENCH**® products offer industrial-strength formulas that are designed to help automotive and industrial professionals get the job done. Each product is engineered for performance and driven by the latest chemical technology, with dependability and the highest standards of safety built right in. Innovating since 1941, **LIQUID WRENCH**® focuses on creating products that solve lubrication problems that span automotive, heavy duty, MRO, agriculture, and home applications.

Formulated with
Teflon™
For prolonged performance

LUBRICATING OIL

Liquid Wrench Lubricating Oil with Teflon™ is formulated to effectively free rusted and sticking components and reduces squeaks.

The added Teflon™ leaves a long-lasting film that protects against wear and corrosion. Suitable for many domestic, automotive and agricultural applications.

Size	Qty	Part	Barcode
400ml aero	6	6900	5020618069003

PENETRATING OIL

Liquid Wrench Penetrating Oil with Teflon™ is a fast-acting, anti-seize formula that penetrates corrosion and loosens rusted nuts, bolts and parts. The advanced penetrating formulation dissolves rust and cuts through grease easily. The added Teflon™ reduces friction and component wear.

Size	Qty	Part	Barcode
400ml aero	6	6902	5020618069027

SILICONE SPRAY

Liquid Wrench Silicone Spray waterproofs parts and creates instant non-stick surfaces. Spray on to create super slick surfaces where you need it. Penetrates where other lubricants can't. Safe on metal, most rubber, plastic, wood and vinyl surfaces.

Size	Qty	Part	Barcode
400ml aero	6	6905	5020618069058

WHITE LITHIUM GREASE

Liquid Wrench White Lithium Grease with Teflon™ is a long-lasting lubricant that will not melt or run off. The superior formulation reduces friction helping to extend component life and prevent corrosion.

Size	Qty	Part	Barcode
400ml aero	6	6904	5020618069041

CHAIN & CABLE LUBE

Liquid Wrench Chain & Cable Lube with Teflon™ is suitable for use on all chains and wire cables and is 'O' & 'Z' ring compatible. The anti-fling formulation has an optimized drying time for maximum protection extending chain & gear life whilst preventing rust.

Size	Qty	Part	Barcode
400ml aero	6	6906	5020618069065

ENGINE TREATMENT

Gives durable protection during successive oil changes and tough stop-go driving. A unique formula for all new and old petrol & diesel engines.

Single	12	MFC119	5012465001190

DIAMOND GLIDE WHITE PADS

A top quality medium firm foam, ideal for compounding and polishing.

Part No	Dims	Pack	Case Qty
DGS762	80 x 30mm	Single	5
DGS762/2	80 x 30mm	Twin	5
DGS751	150 x 30mm	Single	5
DGS751/2	150 x 30mm	Twin	5
VEL751	150 x 30mm	Single	5
VEL760	95 x 30mm	Single	5

DIAMOND GLIDE BLACK PADS

A unique, super-soft foam that gives an excellent finish when waxing and final polishing.

Part No	Dims	Pack	Case Qty
DGS746	80 x 30mm	Single	5
DGS746/2	80 x 30mm	Twin	5
DGS752	150 x 30mm	Single	5
DGS752/2	150 x 30mm	Twin	5
DGS782	203 x 30mm	Single	5
VEL761	95 x 30mm	Single	5
VEL752	150 x 30mm	Single	5

WHITE PADS

A quality closed cell medium firm foam suitable for compounding and polishing.

Part No	Dims	Pack	Case Qty
REF503	150 x 50mm	1	5
REF503E	150 x 50mm	1	5
REF504	150 x 50mm	1	5
VEL512	150 x 50mm	1	5

BLUE PADS

An open cell medium foam ideal for polishing and light compounding.

Part No	Dims	Pack	Case Qty
REF545	150 x 50mm	1	5
REF546	150 x 50mm	1	5
VEL544	150 x 50mm	1	5
VEL549	120 x 35mm	1	5

YELLOW PADS

A super hard foam ideal for aggressive cutting.

Part No	Dims	Pack	Case Qty
VEL671	160 x 30mm	Single	5
Coarse texture			
REF520	160 x 50mm	Single	5
REF521	160 x 50mm	Single	5
VEL532	160 x 50mm	Single	5

ORANGE PADS

A quality closed cell medium foam suitable for compounding and polishing.

Part No	Dims	Pack	Case Qty
REF500	150 x 50mm	1	5
REF501	150 x 50mm	1	5
VEL511	150 x 50mm	1	5
VEL534	150 x 25mm	1	5
VEL711	95 x 25mm	1	5
VEL670	160 x 30mm	1	5
VEL300	80 x 30mm	1	5

DIAMOND GLIDE ORANGE PADS

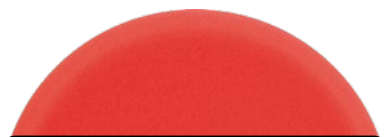

A quality open cell medium foam suitable for compounding and polishing.

Part No	Dims	Pack	Case Qty
DGS749	80 x 30mm	Single	5
DGS749/2	80 x 30mm	Twin	5
DGS750	150 x 30mm	Single	5
DGS750/2	150 x 30mm	Twin	5
VEL750	150 x 30mm	Single	5

RED PADS

An open cell medium foam ideal for polishing and light compounding.

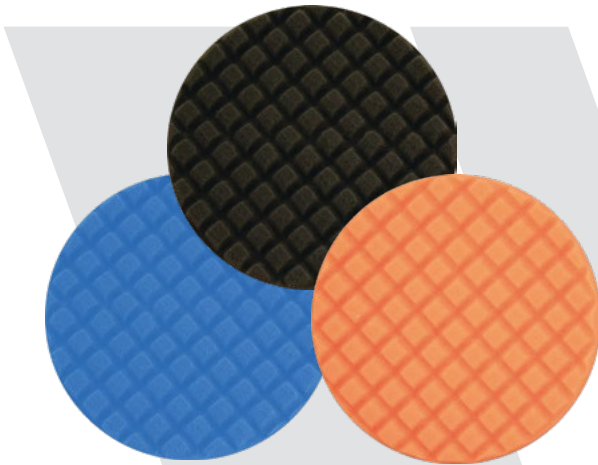

Part No	Dims	Pack	Case Qty
Red			
REF565	150 x 50mm	1	5

DIAMOND GLIDE BLUE PADS

An open cell medium foam ideal for compounding.

Part No	Dims	Pack	Case Qty
VEL748	80 x 30mm	Single	5

BLACK	BLACK			

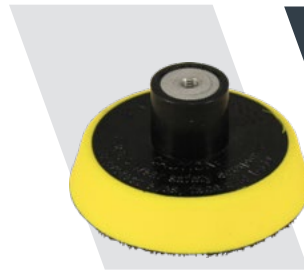

DIAMOND GLIDE Foam Pads are uniquely designed to effectively solve problems with paint defects and give a perfect finish. The diamond shape design on these unique high quality foams work to achieve extra cutting performance, easier control, cooler running speeds, reduced friction and work immediately with no need for priming. A comprehensive range of foam pads with varying densities and compounds for all types of bodywork final waxing and buffing.

SUPER SOFT BLACK PADS

A top quality, medium-firm foam, ideal for compounding and polishing.

Part No	Dims	Pack	Case Qty	
REF523	150 x 50mm	1	5	
REF524	150 x 50mm	1	5	
VEL531	150 x 50mm	1	5	
VEL673	160 x 30mm	1	5	

CUSHIONED BACKING PLATE

THE ORIGINAL AND STILL THE BEST!

AUTO GROOM UPHOLSTERY CLEANER

High performance and ever popular foaming upholstery cleaner.

Size	Qty	Part	Pallet Qty	Barcode
500ml aero	12	7003	108	5017419171011

FLUNKY CAR CLOTH

Super absorbent car cloth. Washes, dries and cleans without streaking.

Size	Qty	Part	Pallet Qty	Barcode
46cm x 44cm	20	A167A	200	N/A

CHEMICO VALVE GRINDING PASTE

The original valve grinding paste, supplied with both smooth and coarse in one tin.

- Fine - 220 grit
- Coarse - 80 grit

Size	Qty	Part	Pallet Qty	Barcode
100g	12	0331	100	5060085230001

CE-LIT

Cures leaky radiators and water pumps, even when used with antifreeze. Powder formulation comes in handy sachets for cars, or tubes for larger vehicles such as trucks and tractors. Not suitable for certain Rover models.

Size/Pack	Qty	Part No	Pallet Qty	Barcode
Sachet/Card	6	0244	N/A	5020618002444

300ml	12	0405	126	5020618004059

HYLOMAR®

UNIVERSAL BLUE

Hylomar Universal Blue is one of the world's leading non-setting gasket and jointing compounds, widely used in the automotive, aerospace, defence and general engineering industries where a non-setting, flexible seal is required.

HYLOTYTE RED 100

The ultimate semi-hardening gasket and jointing compound. Inhibits galvanic corrosion between dissimilar metals. Resistant to petrol, oil, water and anti-freeze, steam and hot water.

INNOVATION IN EVERY SOLUTION

At Granville, innovation drives everything we do. Our investment in state of the art filling, packaging and quality control technology reflects our commitment to delivering consistent, high quality automotive oils and chemicals to customers across the United Kingdom and beyond.

Our advanced production lines integrate robotic automation at every critical stage. Pallet handling is performed by high precision robotic systems, ensuring safe, accurate and efficient movement of finished goods. Robotic bottle picking and placement systems feed containers smoothly onto the line, where fully automated filling equipment delivers precise volumetric control for every product.

Cap placement and tightening robots apply exact torque accuracy, ensuring secure closure integrity across all packaging formats.

Each bottle then passes through our Advanced Visual Evaluation and Rejection System, AVERS.

Using ultra high-resolution, high-speed imaging, the system inspects every unit to verify label accuracy, correct positioning, product matching and precise cap sealing. Only products that meet our strict standards proceed forward.

An advanced tracking system prints batch number, date and time on every bottle, providing complete traceability and transparency throughout the supply chain.

Supporting this technology, our in-house blow moulding machinery, expanded production areas and multiple large capacity storage tanks enable us to continually increase both output and efficiency. Through ongoing investment and automation, we strengthen capacity, enhance quality control and ensure dependable performance in every bottle we produce.

Progress is built into our process...

WHY CHOOSE GRANVILLE OIL?

In the pursuit of a carbon-neutral future, the UK faces the challenges of transitioning to electric vehicles, but is still very much reliant on internal combustion engines to bridge the gap. For many drivers, however, the reluctance to embrace electric vehicles is driven (excuse the pun) by concerns about range, charge point availability (and cost), and the time required to plug in and recharge.

Consequently, hybrid and traditional combustion-powered vehicles remain integral, propelling continuous advancements in engine technology to achieve higher power outputs and fuel efficiencies from smaller engines.

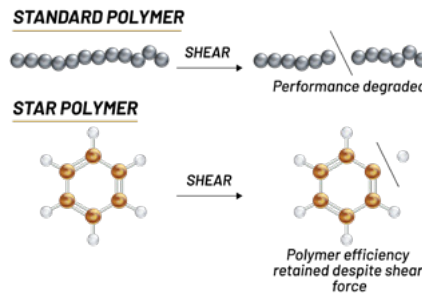

Modern engines, particularly those in smaller vehicles, are engineered with tighter tolerances than ever, operating at higher RPMs. In the early 1990s, just three oils covered the majority of vehicles on the road at that time, 10W-30, 10W-40, and 20W-50. Fast forward to today, where ultra-low viscosity oils are needed to meet ever more stringent emissions legislation and to assist manufacturers in achieving higher power and torque figures from smaller capacity engines. These include 0W-20, 5W-20, 5W-30 and 0W-16 even 0W-8 for some petrol and hybrid applications, not to mention the myriad of manufacturer specific oils and approvals required to service modern vehicles.

This places an increased demand on lubricating oils to provide optimal performance, as the oil must maintain a thin yet robust film strength for effective lubrication. The challenge lies in ensuring the fluid's shear stability, resisting the forces generated by the engine's movement. Traditional viscosity index improvers, with long linear chains, offered cost-effective

thickening efficiency but rapidly degraded under high shear conditions, diminishing engine protection over time. To address this challenge, Granville performance fluids utilise star-shaped polymers, significantly enhancing resistance to shear forces and ensuring sustained engine protection throughout extended drain intervals.

Illustration: Linear vs. Star Polymer

Employing industry expertise and cutting-edge technology, Granville's oils are meticulously crafted using premium base oils, Esters, and PAO (Polyalphaolefin) fluids, combined with advanced viscosity index improvers, antioxidants, and detergents. Their meticulous formulation guarantees optimum performance, engine cleanliness, and maximum fuel efficiency.

Traceability to the Minute

Granville upholds the highest quality standards through its ISO-accredited quality management system. Traceability is not only maintained at the batch level, but is taken down to the minute details. Each Granville lubricant carries a batch number indicating the filling line number, batch date, and even the precise time the bottle was filled, or the box was completed. This commitment to traceability instils absolute confidence that the oil meets the manufacturer's recommendations, ensuring unparalleled precision and quality.

In an automotive landscape where mistakes can prove extremely costly, Granville is there to help protect your customer's cars and your business's reputation. Quality oil, using quality additives, and with full traceability. Can your business afford not to use a quality lubricant? Then, simply put, choose Granville!
